Experience

Full Stack Software Engineer (remote)

Dookita | Nigeria, Lagos | February 2018 – March 2018

Worked with a team of 3, using Slack app to communicate. Developed API using PHP/Laravel with VueJs to develop an online platform for medical doctors and patients. I also used react native to build android application for the platform.

Senior Full-Stack Developer

Instantcars | Nigeria, Lagos | July 2017 - Sept 2017

Instantcars is a startup, founded in 2017. They build an online platform to hire cars. I improved the user experience on the Front-End interface and redesigned it according to Visual Management and Usability principles, to provide an easier navigation and a better visibility on the information. I developed with Bootstrap, Angular, CSS3 & HTML5 and PHP (Laravel) as the backend.

Full Stack Software Engineer (remote)

domail | Lagos, Ng| August 2015 – May 2016

Worked as a backend developer at domail. We developed an online email platform using jquery and laravel/php), then subsequently we used angularjs version 1.x to build the admin dashboard

Freelance Senior Web Engineer

Nigerian Institute of Arbitrators (Nicarb) | Nigeria, Lagos | Jan 2014 - Oct 2017

Designed the institute website and developing a staff management platform to manage their staff, I developed with Bootstrap, cakephp and jquery.

Software Engineering Concepts

Agile Methodologies, Object-oriented Design, REST, Test-Driven Design, Mvc.
